Is your upload traffic rate limited?

Your ISP appears to rate limit your uploads.

Details:

- **Your ISP appears to allow higher bandwidth for your BitTorrent uploads.** In our tests, uploads using control flows achieved up to 2866 Kbps while uploads using BitTorrent achieved up to 5738 Kbps.
- **Your ISP appears to rate limit uploads on port 6881.** In our tests, uploads on port 6881 achieved up to 5738 Kbps while uploads on port 57556 achieved up to 2824 Kbps.

Is your download traffic rate limited?

There is no indication that your ISP rate limits your downloads.

However, some of the measurements were affected by noise, which limits Glasnost ability to detect rate limiting.

Details:

- **There is no indication that your ISP rate limits your BitTorrent downloads.** In our tests, downloads using control flows achieved up to 13431 Kbps while downloads using BitTorrent achieved up to 13420 Kbps.
- **There is no indication that your ISP rate limits downloads on port 6881 or 57556.** In our tests, downloads on port 6881 achieved up to 13431 Kbps while downloads on port 57556 achieved up to 12376 Kbps.

[You can view the detailed measurement results of the test here.](#)

For more details on how Glasnost tests work, please read our [NSDI 2010 paper](#).
